

Providing the tools you need to improve your maintenance program!

One-Day Basic Oil Analysis Workshop

Just \$99
(CAD)

Tuesday, March 23, 2010

8:00 am - 4:30 pm

ALS Laboratory Facility

10717-176 Street

Edmonton, Alberta, Canada

\$99 fee includes:

- ◆ All course materials
- ◆ ALS laboratory tour
- ◆ Lunch
- ◆ Parking

ALS Laboratory Group's Tribology Division is pleased to present an exclusive course in basic oil analysis techniques. This comprehensive and interactive one-day workshop is designed for maintenance professionals. The program includes educating your team on the following subjects:

- Establishing an oil analysis program, including selecting critical equipment and determining sampling frequency
- Selecting the best test methods and procedures for your needs
- Determining proper sampling techniques
- Interpreting testing and analysis data
- Using oil analysis to extend oil drains and for industrial applications
- Coolant and diesel fuel testing industry standards

Our Instructors

Greg Lewis has a mechanical background with over 20 years involvement in the mining, transport, and farming industries. He has hands-on experience as a qualified mechanic working on both light and heavy machinery and later as an

equipment maintenance planner. For the last 21 years, Greg has been employed with ALS Tribology as a diagnostician, laboratory manager, and an operations manager. Greg is a NATA (lab accreditation) signatory and a long standing member of STLE.

Ed Eckert, CLS, OMA I, has 19 years of experience in the oil analysis industry. His expertise in oil analysis is derived from his extensive history with ALS Tribology as laboratory manager, diagnostician, technical service

representative, and through his current position as diagnostics manager. Ed has earned both Certified Lubrication Specialist (CLS) and Oil Monitoring Analysis (OMA I) STLE certifications. His previous experience includes serving in the U.S. Navy as an Engineman (E-5).
